* The fuel consumption and CO₂ values are measured in a controlled environment on a representative production model, in accordance with the requirements of European Regulation EC 2017/1153 (as amended by Regulation EC 2017/1231). The fuel consumption and CO₂ values of your vehicle may vary from those measured. Driving behaviour as well as other factors (such as road conditions, traffic, vehicle condition, tyre pressure, installed equipment, load, number of passengers, etc) play a role in determining a car's fuel consumption and CO₂ emissions.¹ Luggage volumes shown are in-house measured values. All figures quoted include the maximum under floor storage area in the luggage compartment. The available under floor storage area may differ in certain countries² Towing package is standard on all grades, and therefore hands-free back door opening feature is not available.Please note: further Technical Data, including any updates, can be found at www.lexus.eu/www.lexus.lv/www.lexus.lt
